Club Capital Works Budget Template

A comprehensive line-item budget framework for club redevelopments covering every cost category from land acquisition through to opening night.

Most club budgets understate the true cost of a redevelopment. They omit line items that don't appear until the project is underway — interest during construction, Long Service Levy, developer contributions, temporary member facilities, and commissioning costs. This template covers all of them.

The cost ranges below are benchmarked against a **$12M project** (a typical mid-scale club redevelopment in NSW as of 2026). Adjust proportionally for your project scale — see the assumptions section for guidance on smaller and larger projects.
